OUConvenient *Lighting*: The **BRIGHT CHOICE** For Exterior Lighting Solutions

For more than 75 years, OUC has been providing reliable power to light up Orlando. Now we're taking our commitment to reliability even further – with OUConvenient *Lighting*.

OUConvenient *Lighting* provides complete outdoor lighting services for a wide spectrum of commercial and residential applications – from industrial parks to sports complexes to tree-lined neighborhoods. To ensure a solution that's just right for you, OUConvenient *Lighting* customizes your service package, allowing you to choose from dozens of fixture/pole combinations.

Offerings include traditional streetlights, highly efficient optical systems for parking lots and elegant residential lampposts. All of our products, of course, come with the high-level customer service you've come to expect from OUC.

Besides installing new lighting systems on your property, OUConvenient *Lighting* can retrofit existing fixtures to new light sources or higher-output units. And we also provide preventive and corrective maintenance.

OUConvenient *Lighting* creates financial advantages for you, too. Because we handle all up-front costs, developers can use the capital they would have spent on fixtures, poles and related equipment for other money-making ventures.

Make the bright choice. Call OUConvenient *Lighting* today at 407.236.9651.
