

## THE PROCESS

### Before work begins:

1. Prepare and submit a Project Application. You can download the application at: [WWW.OUC.COM/SAVEYOURWAY](http://WWW.OUC.COM/SAVEYOURWAY)
2. Schedule on-site inspection(s) and meeting(s) with OUC to review proposed project.
3. Work with OUC through the incentive funding commitment and approval process.
4. Receive OUC project approval and incentive funding commitment.
5. Perform any required pre-installation Measurement and Verification (M&V).

### After work is complete:

1. Submit Installation Report.
2. Perform post-installation M&V.
3. Document the kW and kWh savings.
4. Schedule on-site inspection(s) by OUC to confirm installation and M&V results.

Obtain final approval from OUC and receive rebate in the form of a billing credit on OUC monthly statement

At OUC we are committed to weaving sustainability through everything we do while providing clean, reliable and affordable energy and water to our customers.

# COMMERCIAL & INDUSTRIAL CUSTOM INCENTIVE PROGRAM

O-1105V1

## Green your BOTTOM LINE

[SAVE@OUC.COM](mailto:SAVE@OUC.COM) | 407.434.2295  
[WWW.OUC.COM/SAVEYOURWAY](http://WWW.OUC.COM/SAVEYOURWAY)

**CUSTOM COMMERCIAL & INDUSTRIAL  
INCENTIVE PROGRAM**

*It pays to save your way*

**ELIGIBILITY**

This program is available to:

- Any commercial customer on the OUC system
- Existing facilities with retrofit opportunities
- New facilities constructed to exceed minimum code requirements

**INCENTIVES**

Customer's receive incentives based on the reduction in peak demand that their projects achieve.

- \$250 per kW reduction of Summer Demand defined as weekdays, between noon and 9 p.m., from April through October.
- Projects that consist of only lighting measures receive \$150/kW incentive.
- A maximum incentive of \$50,000 per project and \$100,000 per customer annually.

**WAREHOUSE LIGHTING RETROFIT EXAMPLE**

Lighting System	Peak Demand (kW)	Annual Energy Consumption (kWh)
Original	91	696,000
New	47	286,000
Savings*	44	410,000

Initial Project Cost	\$64,000
OUC Custom Commercial/Industrial Incentive (44 x \$150/kW rebate)	\$ 6,600
Net Project Cost	\$57,400

**ANNUAL ENERGY SAVINGS\*\*** **\$35,322**  
*Total*

**PAYBACK PERIOD**

**\$57,400 / \$35,322 = 1.6 Years or 20 Months**  
(project cost) (energy savings)

\*Demand savings incentives are paid for the maximum one-hour average demand reduction that occurs when the newly installed system is operating at peak conditions during the summer period.

\*\*(\$8 monthly demand charge x 12 months x 44 kW) + (7.585¢ x 410,000 kWh)

For full eligibility requirements and incentives, please visit [www.ouc.com/saveyourway](http://www.ouc.com/saveyourway).

**ENERGY SAVING MEASURES**

Part of the project requirements to qualify for the program is choosing an energy efficient measure. The following is a table of approved measures.

End use	Pre-approved energy efficiency measure
Cooling	Packaged cooling unit replacement
	Chiller replacement
	Constant air volume to variable air volume conversion
	Fan and pump variable-speed drive installations
	Thermal Storage cooling systems
Lighting	High efficiency fluorescent lighting (T-8s, T-5s)
	Lighting controls to reduce operating hours (in conjunction with lighting efficiency measures only)
	LEDs
Refrigeration	Air cooling and refrigeration compressor replacement projects
Industrial Process	Variable-speed drive installations on industrial fans and pumps
	All motor-efficiency upgrade projects
