

OUC Rebate Programs

Make your home more energy efficient — and save money

The Reliable One®

Make Your Home More Energy Efficient...

And OUC Will Help Foot the Bill

Boosting your home's energy efficiency can do more than just save you money on your monthly utility bill. Qualified homeowners can even apply for a bill credit or financing from OUC through our Home Energy Efficiency Programs.

Whether you're looking to make a small change—with weather stripping or window tinting— or you're looking to invest in a new AC system or attic insulation, OUC can help pay for some of the improvement costs.

When you're ready to start, simply follow the guidelines to the right and you can take part in any of our three rebate programs:

- OUC's Energy Efficiency Rebate Program
- OUC's Financed Insulation Program
- OUC's Efficient Electric Heat Pump System Program

For a customized look at how your household uses energy each month — and for quick, easy tips for saving money — visit OUC's free Online Home Energy Audit at www.ouc.com. Based on information you provide, the Online Home Energy Audit will generate a personalized report on your energy usage and how you can lower your utility bills.

Energy Efficiency Rebate Program

Saving energy around your home doesn't always take a big investment. There are dozens of ways you can make your home more energy-wise, without emptying the bank.

- **With our Energy Efficiency Rebate Program, we can even help pay for some of the improvements.**
- **We will rebate up to \$100 to upgrade your existing attic insulation to R-19 or more.**
- **We will rebate up to \$75 on your purchase of caulking, weather stripping, window tinting and/or solar screening (recommended Shading Factor .5 or better).**
- **We will rebate up to \$75 on repairs made to leaking ducts.**

If you have questions or need

Financed Insulation Program

One of the easiest ways to lower your monthly electric bill is with high efficiency attic insulation, and OUC can help make it affordable.

Insulating your home can help you lower your energy costs and keep you comfortable through all seasons. Best of all, with our Financed Insulation Program, we'll split your costs over your monthly utility bill — for up to two years.

- **The Finances Insulation Program provides 100 percent interest-free financing to insulate your attic to a minimum R-19 level.**
- **You could have up to two years to pay with no money down.**
- **A small monthly payment will be added to your utility bill.**
- **A rebate of \$100 will be deducted from the financed amount.**
- **The maximum amount that can be financed is \$600.**

Efficient Electric Heat Pump System Program

You can also save a bundle by replacing your old heating and cooling system with an energy-efficient electric heat pump system. In fact, if you choose a heat pump with a Seasonal Energy Efficiency Ratio (SEER) of 14 or higher, you could cut the cost of electricity significantly.

But, that's not all. In addition to what you'll save on your electric bill, OUC will kick in a rebate for your energy-conscious effort.

HEAT PUMP SYSTEM REBATES

Based on these efficiency ratings:

SEER 14 – \$100 Rebate

SEER 15 – \$200 Rebate

SEER 16 – \$300 Rebate

Customer must submit a receipt with inside and outside model numbers and an ARI form from the contractor.

How to Qualify for Your Rebate

Applying for a rebate through OUC's Home Energy Efficiency Program is easy — just follow the steps below.

- 1.** Be sure you meet the basic qualifications. This program is available to OUC residential electric customers only. Also, your home must have some type of electric heating and/or cooling system. For programs with a financing option, you may need to meet minimum credit rating requirements.
- 2.** Contact OUC at **407.423.9018** in Orlando or **407.957.7373** in St. Cloud to schedule a free OUC Home Energy Audit.
- 3.** Once your audit is complete, choose a qualified, licensed and insured contractor for your new equipment installation. A complete list of OUC-approved contractors in your area is available at www.ouc.com/contractors.
- 4.** When work is complete, fill out the attached rebate application and mail it to the address below for verification and processing. Be sure to include your contractor invoice or proof of purchase for your materials.
- 5.** For heat pump system rebates, request an Air Conditioning and Refrigeration Institute (ARI) Form from your contractor and attach it to the invoice and rebate application. The ARI Form helps document the SEER rating of the heat pump.
- 6.** Make sure to keep copies of your invoices and proof of the material(s) used. OUC may conduct an on-site verification of installation to ensure proper qualification.
- 7.** A credit in the amount of the rebate will be applied to your OUC utility bill. Please allow 6 to 8 weeks for processing.

Mail completed rebate form and receipts to:

**OUC Conservation Support
P.O. Box 3193
Orlando, Florida 32802**

NOW ON DVD . . . The OUC Home Energy Survey

Do you know what your home's "thermal envelope" is? How about which appliances use the most electricity? You can find answers to those energy-saving questions — and more — just by tuning in to our new Home Energy Survey DVD. We'll walk you through a "do-it-yourself" energy survey — in English or Spanish — that will help you save money on your utility bill . . . and keep your home comfortable at the same time.
