OUC

AND NEMOURS CHILDREN'S HOSPITAL:

empowering
the next generation.

To educate children about the benefits of saving energy and water, OUC sponsored a "Believe in Conservation" art contest. Winners participated in Nemours' grand opening by flipping the switch on the hospital's multi-colored lights.

At OUC—The *Reliable* One, partnering with Nemours Children's Hospital means far more than just powering one of the area's newest state-of-the-art medical facilities. It also means helping Nemours conserve energy and protect the environment.

One example: multi-colored, energy-efficient LED lighting designed to give young patients at Nemours a small sense of control and comfort during their hospital stay by allowing them to choose the color of lights in their rooms.

These lights not only illuminate the Orlando skyline, they also help brighten the world for the children at Nemours – reflecting the power of strong community partnerships.

The iconic image of colorful, energy-efficient LED lights at Nemours Children's Hospital shows millions of visitors flying in to Orlando that the city is home to innovation in Lake Nona's emerging Medical City.
