

NOTICE FOR BUSINESS CUSTOMERS ONLY

WASTEWATER BILLING CHANGE

Beginning July 5, the way commercial businesses are billed for wastewater will change. Currently, wastewater is billed based on a twelve-month moving average of water usage.

For example, if your monthly water usage average for the last 12 months was 52,000 gallons, your bill is calculated using a 52,000 gallon average.

INSIDE CITY

$52,000/7000 \times \$18.73$ plus \$4.52 times each thousand gallons of water usage on current bill.

OUTSIDE CITY

$52,000/7000 \times \$23.42$ plus \$5.64 times each thousand gallons of water usage on current bill.

Effective July 5, your bill will be based on actual monthly water usage.

For example, if your water usage in a given month is 50,000 gallons, your bill will be calculated using the current usage of 50,000 gallons.

INSIDE CITY

$50,000/7000 \times \$18.73$ plus \$4.52 times each thousand gallons of water usage on current bill.

OUTSIDE CITY

$50,000/7000 \times \$23.42$ plus \$5.64 times each thousand gallons of water usage on current bill.
