# CITY OF ORLANDO

## *Sewer Rate Adjustment*

**EFFECTIVE OCTOBER 1, 2018**

Dear Customer,

To satisfy the water needs of our growing community, it is necessary for the City to participate in the development of alternative water supplies such as cost-effective reclaimed water (highly-treated wastewater).

The capital and operating costs of producing and distributing high quality reclaimed water have been steadily increasing. The Orlando City Council approved a series of rate increases that will help to ensure the availability of reclaimed water supplies for the protection of limited water resources in our community and the region.

For more information about wastewater and how you can conserve water resources, visit
