HAPPY NEW YEAR 2020

Area residents gathered in December to discuss Central Florida's Energy Future.

Tuesday, January 14
6:30 p.m.

Englewood Neighborhood Center
6123 La Costa Dr #2931
Orlando, FL 32807

(Traducción al español disponible)

Thursday, January 16
6:30 p.m.

The Pavilion at Avalon Park
13401 Tanja King Blvd
Orlando, FL 32828

RSVP to RSVP@ouc.com by January 10. Dinner will be provided.
RSVPs required as seating is limited.

OUC'S ENERGY FUTURE DISCUSSIONS TO CONTINUE THIS MONTH

The conversation about OUC's energy future will continue with the addition of two community forums. Customers are invited to attend and offer feedback on our Electric Integrated Resource Plan (EIRP), a roadmap to meeting electric energy generation and transmission needs for the next 30 years.

The EIRP will define our electric future in a way that balances reliability, affordability, sustainability and resiliency.

Additional forums were added after three December engagement events in Orlando and St. Cloud yielded strong community interest in

learning more about the EIRP, why it's important, how it will affect our community, and the work done to date. The forums also offer OUC customers the opportunity to express their views about our electric generation future as we continue to support the City of Orlando's clean energy goals.

Results of the EIRP study are expected to be available in June 2020.

Can't make it to a meeting in person? Contact an EIRP Advisory Council member to voice your opinion. Learn more at www.oucroadmap.com.

rebate

NEW! SOLAR PV BATTERY REBATE*

Solar PV systems are a great way to save on your utility bill and help the environment at the same time, but Central Florida's unpredictable cloud cover can affect performance.

That's why OUC has introduced a new **rebate up to \$2000** to help with the cost of installing a battery so you get the most out of your solar PV array.

Learn more and check eligibility at OUC.com/rebates. *Limited quantities.

COLD WEATHER ENERGY EFFICIENCY TIPS

Did you know winter electric bills can be two to three times higher than fall or spring bills?

Check out these tips to warm up to savings during cold weather season:

- Keep your thermostat at 68 degrees. For each degree above 68, the heating portion of your bill can increase four to six percent.
- Set the thermostat fan to "Auto."
- Be sure to replace dirty filters.
- Install a programmable thermostat to adjust the temperature automatically.
- Keep drapes and blinds open during the day to let in the sun's heat.
- Set your ceiling fan to run clock-wise to force warmer air toward the floor.

Get more winter safety and efficiency tips at OUC.com/coldweather.

KEEP AN EYE ON YOUR ENERGY CONSUMPTION WITH OUC'S USAGE DASHBOARD

OUC's online Usage Dashboard helps track energy consumption so you can understand the days and times you use it the most.

Making small changes based on this information can lead to more informed usage decisions and ultimate energy savings.

To view your dashboard, log in to my.OUC.com and click the blue "View Usage" button.
