OUC PARTNERS WITH AIRPORT ON SUSTAINABLE ENERGY SOLUTIONS

OUC will help raise the visibility of Orlando International Airport's (MCO) sustainability efforts with installations of a floating solar array and 67 electric vehicle (EV) charging stations – part of a 20-year agreement that entrusts OUC to deliver and manage a unique portfolio of energy and water services at Orlando International's new South Terminal Complex.

The airport's floating solar array will be shaped as a giant "O" and situated in a pond between the main and South terminals, making it highly visible to visitors arriving to Orlando. Meanwhile, the 67 EV charging stations will be positioned so they're readily accessible to EV drivers and visible to travelers passing through MCO. Under terms of the agreement with the Greater Orlando Aviation Authority (GOAA), OUC will also provide chilled

water services, emergency distribution power and back-up generation, as well as on-site staffing for airport facilities.

"We're honored that GOAA is relying on us to provide such a diverse range of services," said **Clint Bullock**, OUC General Manager & CEO. "These additions display our commitment to being one of the greenest cities in the nation. Our great 96-year reputation is opening doors to new opportunities and partnerships with customers who need innovative and customized services."

FEDERAL GRANT TO HELP OUC, LYNX ELECTRIFY MASS TRANSIT

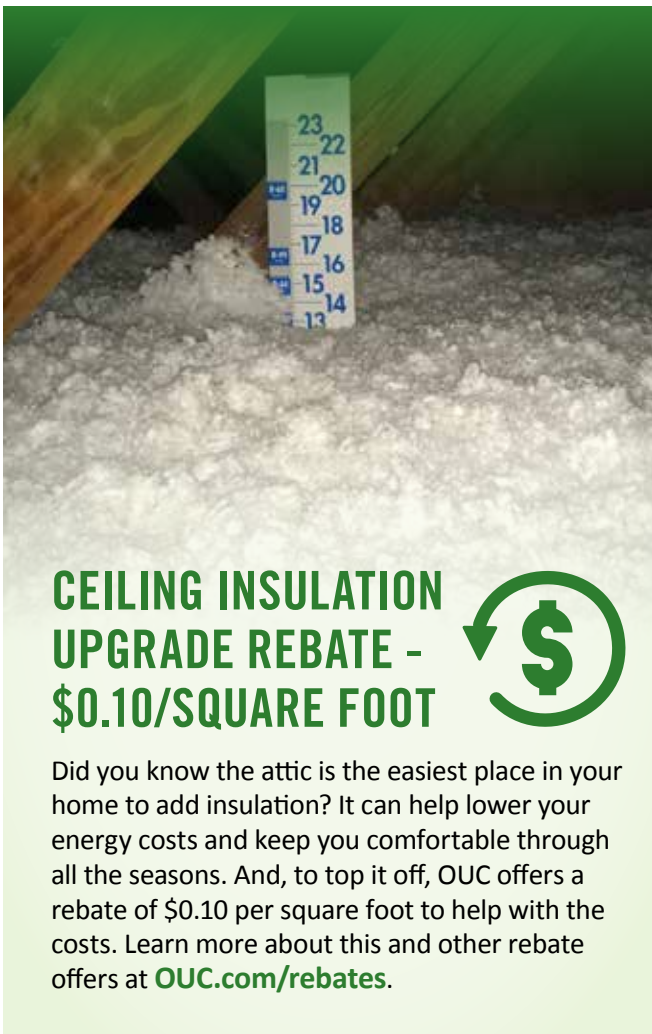

A recent \$1.9 million Low or No Emission grant from the Federal Transit Administration (FTA) will help OUC and LYNX, Central Florida's mass transit provider, purchase or lease zero-emission and low-emission busses to operate on the LYMMO Grapefruit, Lime and North Quarter lines. LYNX will benefit from real-world operating experiences and OUC from important battery performance data.

"We are proud to work with LYNX and the City of Orlando to electrify transportation across our region. We've worked hard to create a robust charging infrastructure for residents and now we're

excited to make an even greater impact with mass transit," said Clint Bullock, General Manager & CEO.

The electrification of both electric and commercial vehicles is a crucial step on our path to ensuring an environmentally friendly future.

CEILING INSULATION UPGRADE REBATE - \$0.10/SQUARE FOOT

Did you know the attic is the easiest place in your home to add insulation? It can help lower your energy costs and keep you comfortable through all the seasons. And, to top it off, OUC offers a rebate of \$0.10 per square foot to help with the costs. Learn more about this and other rebate offers at OUC.com/rebates.

KID POWER! CONSERVATION EDUCATION FOR CHILDREN

At OUC, we believe energy- and water-conscious children are the keys to a sustainable tomorrow. That's why we're excited to offer Kid Power!, a fun, interactive online platform to where kids can learn where energy and water comes from and easy ways to conserve these resources. *Get started at OUC.com/KidPower.*

OSCEOLA COUNCIL ON AGING – SERVING ALL GENERATIONS

The Osceola Council on Aging has proudly served Osceola County residents for over 48 years. As the largest non-profit, private charitable organization in Osceola County, the organization is dedicated to providing services to enable independence and self-sufficiency for seniors, disabled adults, the disadvantaged and families in poverty. Located at 700 Generation Point, Kissimmee, the Council on Aging provides an array of services and volunteer opportunities, such as Meals on Wheels, Senior Dining, Adult Day Health Care, Emergency Energy Assistance, Food Pantry, Senior Housing and Weatherization.

Volunteer opportunities for individuals and groups are available, with the greatest need for Meals on Wheels deliveries one to two hours per week.

To learn more about the *Osceola Council on Aging* or how become a volunteer, call **407-846-8532**, Monday through Friday, 8 a.m. to 5 p.m.
