Report Streetlight Outages

Now that fall is here and winter is right around the corner, it's getting dark much earlier. OUC—The *Reliable One* wants to make sure your community is well lit for better visibility and safety for motorists, pedestrians and law enforcement. OUC crews are working diligently to repair or replace broken or burnt-out streetlights, but with your help, we can do this even quicker!

If you spot a streetlight outage, be sure to report it online at www.ouc.com/streetlightout or by phone at **407-423-9018** in **Orlando/Orange County** and **407-957-7373** **St. Cloud/Osceola**. If you can jot down the asset number on the light pole itself, it will help us pinpoint the broken fixture. We're also in the process of converting many older streetlights to longer-lasting and more energy-efficient LED lights so help us keep our streets out of the dark!

OUC Power Pass Allows Customers to Prepay for Services

OUC recently launched Power Pass, a new prepaid program that allows you to pay-as-you-go for utility services. Instead of getting a monthly bill, Power Pass customers can monitor their electric usage daily from a computer, tablet or smartphone. With Power Pass you can pay when you want, how you want and the amount you want.

Think of Power Pass like it's your car's gas tank. You pay for gas at the pump and keep an eye on your fuel gauge as you drive around. When the gauge shows you're running low on fuel, it's time to head to a gas station and refill your tank. Power Pass is just that easy!

Power Pass is perfect for customers who want to avoid paying deposits and late fees and like the opportunity to monitor and control their utility usage. Power Pass is also a great plan if you split your utility bill with roommates or if you travel frequently and don't consume electricity on a regular basis. For more information about OUC Power Pass or to sign up, visit www.ouc.com/powerpass.

LED TVs Save \$\$\$ and Energy

The days of tube television consoles with 13 channels are long gone. Just walk in to a big-box electronics store, and your jaw will drop at the sleek new designs, high definition picture and increasingly larger screens. But, in most cases, the larger the screen, the larger your bill.

First came plasma screens, then LCD (Liquid Crystal Display) and now LED (Light-Emitting Diode). LED TVs are significantly more energy efficient than their predecessors. In fact, LED TVs use about 40 percent less energy than their LCD counterparts.

So, if you find a great deal on an LED TV this holiday season, buying one could pay off in the long run.

Beware of Phony Collections Calls

Please be aware of an on-going utility collections scam targeting small businesses. Scammers typically claim customers have an overdue bill and threaten to disconnect service unless payment is made over the phone.

OUC representatives will **never** request credit card or banking information via phone or email.

Before OUC disconnects service for non-payment, a customer will receive a postcard in the mail notifying them in advance that they are behind on payments. If a customer is called, it would happen **at least one week** prior to disconnection.

If you receive a phone call, email or any other communication claiming to be from OUC that demands payment or other personal information (*social security number, username, password, etc.*), hang up.

If you doubt the legitimacy of a call, please contact OUC directly at customerservice@ouc.com or call **407-957-7373**.
