

## CONSIDERING OUC'S COMMUNITY SOLAR PROGRAM?

OUC's Solar Calculator helps you determine the right amount of solar for your home or business.

The screenshot shows a mobile application interface titled "Community Solar Farm Calculator". It is divided into four steps:

- Step 1:** "Please select the service address location". It features two buttons: "Orlando/Orange County" (selected) and "St. Cloud/Dixie County".
- Step 2:** "Please select the type of building". It features three buttons: "Residential" (selected), "Commercial", and "Commercial Demand".
- Step 3:** "How much energy on average do you use monthly?". It features a slider ranging from 800 kwh to 2000 kwh. The slider is currently positioned at approximately 1000 kwh.
- Step 4:** "What percentage of your monthly usage would you like to be powered by solar energy?". It features a slider ranging from 0% to 100%. The slider is currently positioned at approximately 25%.

At the bottom of the calculator, there are two boxes: "Average Monthly" with a "\$0" icon and "Average Annual Cost" with a "\$0" icon.

## Sharing the Sun

With OUC's Community Solar Program, business and home owners, as well as renters, can power their lives with sustainable, maintenance-free solar energy. Instead of installing your own panels, you can reap the sun's benefits by subscribing all or a portion of your energy bill to the program. It's a simple way to be sustainable without the hassle of panel installation and upfront costs.

## How does it work?

Subscribers choose the percentage of solar power that work best for them, up to 100% in 10% increments. The percentage of electric covered by solar will be charged a special solar rate in lieu of the traditional fuel rates.

## How much will it cost?

Subscribers can opt for a percentage of their electric usage in 10% increments at a fixed solar rate of \$0.06 per kWh in lieu of the normal fuel charge portion of a bill. The minimum subscription required to enroll is 10%. OUC customers can determine the solar amount right for them with our easy online calculator. *(See back cover to learn more about the community solar farm calculator)*

## An Array of Features and Benefits

- No upfront expenses, installation or equipment costs
- No rooftop needed—great for renters, condo owners and customers with rooftops shaded by trees or buildings
- Easy online enrollment
- Join at any time
- Choose the right percentage that fits your life
- Access to renewable energy at an affordable price
- Ability to easily move with you to another residence or business in OUC's service territory
