

# New Home Rebate Program

*Money-saving rebates for energy-smart choices.*

## **OUC is rewarding new home buyers who go green from the ground up.**

When you install Energy Star® heat pump water heaters or other energy-efficient upgrades during construction, OUC will put money back on your bottomline in the form of a credit on your OUC bill. Depending on the type, size and quantity of the measures selected, the resulting rebate could mean you might not have to pay a utility bill the first few months in your new home.

## **How it Works**

- You select the efficiency upgrades you want included in your home.
- The builder installs the measures and the property owner submits the online rebate application to OUC for processing.
- OUC calculates the rebate and puts the credit directly on your monthly statement.

## **Rebate**

## **Rate of Rebate**

**Ceiling Insulation Upgrade** The attic is the easiest place to add insulation; it can help lower your energy costs and keep you comfortable through the seasons.

**\$0.03 per sq. ft.**  
*when processed with Heat Pump or ENERGY STAR® Heat Pump Water Heater*

**Heat Pump** Upgrading to a more efficient unit can lower your electric bill. Annual energy savings for a 15 Seasonal Energy Efficiency Rating (SEER) or greater unit could be up to 30 percent when compared to a 12 SEER unit.

**up to \$1,630**

**Solar Thermal Water Heater** The average system takes up just 40 square feet of roof space and should save between 50 to 85 percent of the hot water portion of the monthly electric bill.

**\$900**

**Energy Star® Heat Pump Water Heater** Utilizing super-efficient technology, an Energy Star® Heat Pump Water Heater that can cut water heating costs by more than half.

**100% of cost up to \$500**
