

"At Lake Nona, sustainability isn't a word we take lightly. That's why it is so important to have a partner like OUC – who not only offers us a variety of energy-saving solutions, but who also believes in caring for the environment as much as we do."

– Jim Zboril, President/Lake Nona

OUC and Lake Nona: Giving Sustainability a "Green" Light

Laureate Park at Lake Nona features six showcase homes that are models of energy-efficient living.

Achieving the right balance between environment and lifestyle is a cornerstone of community development for Laureate Park at Lake Nona. Located in the heart of Lake Nona Medical City, its homes are "built green"

and feature the latest in forward-thinking energy-saving technology.

So when it came to finding a partner who shared the same commitment and could also provide the infrastructure to support growth, Lake Nona knew they could count on OUC—The *Reliable One*. With a long history of environmental stewardship and a full array of efficiency and conservation programs that empower homeowners to save real energy and real dollars,

OUC is now illuminating the night sky at Laureate Park with safe, energy-efficient light-emitting diode (LED) lighting, which helps the neighborhood as a whole save electricity.

From street lights to electric-vehicle charging stations to rebates that reward energy-smart choices, OUC is helping customers make their mark. Conveniently. Affordably. And reliably green.
